Project Title: Task Management App – Agile Simulation

Objective:

To simulate the Agile methodology by managing a sample mobile app project using Trello, showcasing project management skills such as sprint planning, execution, retrospective reporting, and basic UI prototyping.

Scope:

- Define and manage User Stories for core features (Add Task, Mark Complete, Notifications, etc.).

- Plan and execute two sprints using Trello boards.

- Document progress with screenshots, sprint reports, and retrospective notes.

- Create a UI Prototype (9 key screens) of the Task Management App using Google AI Studio.

- Present outcomes through a professional PPT for interview/demo purposes.

Tools Used:

- Trello – Sprint planning, backlog, and execution

- Google AI Studio – UI Screens (Prototype)

- MS PowerPoint – Final Presentation

- Notion AI – Retrospective Documentation of Project Report

- MS Word – Other documentations

Duration: 2 Sprints

Deliverables:

- User Stories (screenshots/PDF export from Trello)

- Sprint Planning Board & Execution Screenshots

- Sprint Retrospective Reports

- UI Screens (Prototype images)

- Final Project Presentation (PPT)
